

Announcing TieTechnology's New VoIP Business Internet Phone Rates Now Serving Gulf Breeze Filter

TieTechnology is excited about introducing the new, low cost internet phone rates to it's new customer, Gulf Breeze Filter.

TAMPA, FLORIDA, USA, February 15, 2017 /EINPresswire.com/ -- The latest and [most advanced VoIP business phone service](#) is taking worlds of business to business and business to consumer commerce by storm. Offered by Tie Technology, a leading name in business services, Voice over Internet Protocol communications is more powerful than ever before. Companies, like Gulf Breeze Filter, are switching from traditional telephony PBX or private branch exchange landlines in favor of VoIP for the following reasons:

No Technical Expertise Necessary

With VoIP, there's no technical expertise required to set up, manage, or relocate equipment. Businesses are tapping into the power and versatility only the [best-hosted business phone provider](#) can offer and do so without technical skills. Companies enjoy being able to manage easily communications with simple user interfaces. VoIP beats out traditional landlines because there's little to no equipment needed to setup and maintain.

Gulf Breeze Filter likes the new call reporting, call tracking features tied in with the mobility app offered by TieTechnology.”

computer, tablet, or smartphone.

Less Space Required

Affordable Long Distance and International Rates

When companies [compare hosted VoIP business service plans](#) to traditional landline services, it's obvious which is less expensive. For a fraction of the prices, businesses enjoy long distance and international calling. Also, there's little to no acquisition costs involved with VoIP. Companies enjoy the convenience of calls and conferences over the telephone,

Businesses pay hefty premiums for leased space and traditional landline services require substantial space for day to day operations. VoIP, however, is different and only requires minimal space to operate. Also, businesses can save money on support and maintenance because unlike traditional landline telephony, everything is in the cloud.

Manage Data and Communication Easily

Companies are embracing VoIP because it offers far more than traditional landline communications. It shares many common features, such as voicemail, call waiting, call routing, call forwarding, caller identification, and, voice conferencing. Businesses are also able to take advantage of other features like voicemail to email, video conferencing, and managing numbers and extensions. Also, businesses can access and manage all communication types in one central location. From a VoIP interface, team members and managers can access and manage faxes, email, texts, voicemail, instant messaging, and chat sessions.
