

Riverside Debuts New Generation of TouchTek Power Distribution System

Riverside Mfg., LLC has announced the release of the TouchTek Gen 4, a power distribution system that provides control over vehicle electrical loads.

FORT WAYNE, INDIANA, US, December 12, 2016 /EINPresswire.com/ -- Riverside Mfg., LLC has announced the release of the [TouchTek Gen 4](#), a power distribution system that provides control over vehicle electrical loads.

The TouchTek Gen 4 maintains the same functionality of the Gen 3 at an even more competitive price point. In addition, the power distribution unit is half of its predecessor's size, which gives users mounting flexibility in the ever-crowded work truck.

"The evolution of this product is the direct result of us listening to and focusing on the needs of our customers," said David Rednour, Vice President of Sales for Riverside. "They wanted all of the Gen 3 capability in a smaller package and at an even more competitive price point – and we're excited to deliver to them a product that offers exactly that."

Additional features of the TouchTek Gen 4 include a backlit switch panel with the ability to insert function-specific labels, as well as six outputs that boast 20 amps (@12vdc) of current handling capacity each.

Designed for work truck environments, the TouchTek has an operating temperature range of -40°C to +80°C, operating voltage range of 8 to 16vdc, reverse polarity protection, back feed protection, and under/over voltage protection. Users can implement neutral and brake interlocks using the two contingent outputs, making the system even more intelligent.

About Riverside Mfg., LLC

Riverside Mfg., LLC is the industry leader specializing in designing and manufacturing electrical systems and products for harsh environment vehicles and equipment. For over 60 years, Riverside has earned a reputation for excellence in collaborating on custom electronic designs, manufacturing electrical products and building to print. Riverside Mfg., LLC also offers SMT and printing capabilities, and excels in providing cutting edge custom designs and quality products to suit any company's needs.
