an internet connection is available.

TieTechnology Business Phone Service

Yealink T48

VoIP provides high voice call quality and allows seamless communications over many devices. Companies do not have to resign only to traditional telephony, but can access and manage communication from a multitude of devices, wherever

Features of this VoIP system include; call forwarding, call waiting, multiple lines and extensions, call conferencing, call recording, screen sharing, international calling and even video conferencing. Also, other productive features are available through this VoIP system, which include visual voicemail and voicemail-to-email. Businesses also have the power to access and manage multiple message platforms in one location. Texts, email, chat, voicemail, fax, and more are all accessible from one user-friendly interface, ensuring no more missed communications between teams or customers.

Voice over Internet Protocol offers more advantages over traditional telephone systems, such as flexible mobility, working remotely, and automatic data backup in the cloud. Business can rely on safe and secure data management systems at a low cost. Unlike traditional phone services, there is no complicated setup and maintenance is done off-site in the cloud.
