

Arcadier Launches DIY Online Marketplace Solution for Rentals and Services

Arcadier's marketplace software solutions enable anyone to create marketplace websites or platforms like Airbnb or Sharedesk without any programming knowledge

SINGAPORE, SINGAPORE, SINGAPORE, December 16, 2016 /EINPresswire.com/ -- Since the beta launch of Arcadier Marketplaces in July 2016 more than 400 marketplaces from around the world have been created through Arcadier. This month, Arcadier is pleased to announce the much-anticipated release of three new DIY online marketplace solutions:

- 'Service Bookings' marketplace for service appointments.
- 'Rental Goods by type and location' marketplace for equipment and goods rentals.
- 'Space Rental' marketplace for rental of personal or business spaces.

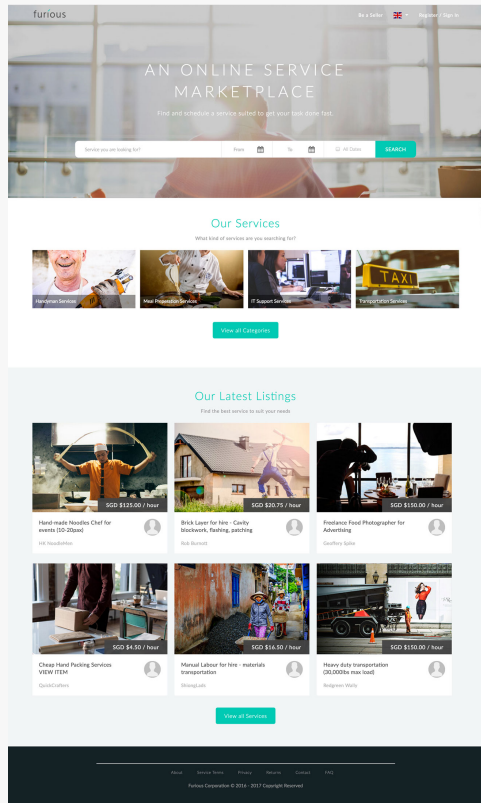

These turnkey marketplace software solutions enable anyone to create marketplace websites or platforms like Airbnb, Sharedesk, Mealsharing.com, Dogvacay or Taskrabbit through a simple step-by-step process and without any programming knowledge required on the user's part.

Arcadier's new marketplace solutions are equipped with many essential features to get a marketplace up and running. More complex features — such as an 'availability calendar' that allows customers to see when timeslots for services or spaces are open — are also provided.

“

we're providing a disruptive technology with which anyone may create a marketplace
Dinuke Ranasinghe

With the launch of its new solutions, as well as the introduction of PayPal as a new payment option on Arcadier Marketplaces, Arcadier is extending its free trial period until January 2017, after which a monthly subscription of US\$79 applies.

“With almost no marketing, the market response to our beta retail product was nothing short of amazing, with demand coming from around the world. We expect a similar response to our new marketplace solutions because we’re providing a disruptive technology with which anyone may create a marketplace,” says Dinuke Ranasinghe, Arcadier’s Chief Executive Officer.

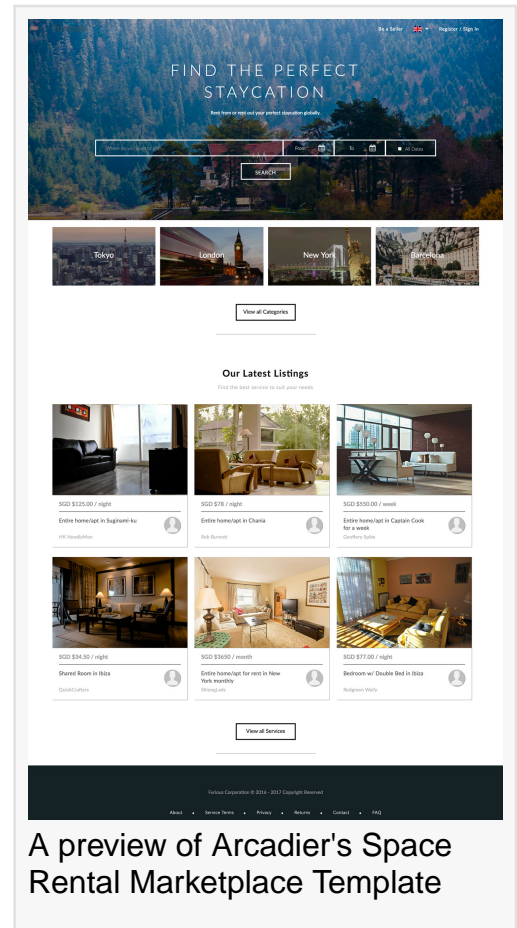

“We’re also working with government groups and multi-national companies looking for a private B2B marketplace for their own intra-company or intra-industry requirements. We hope to launch a solution to satisfy these needs before the end of 2016.”
