The analysts forecast the Global [Cloud Security Software](#) market to grow at a CAGR of 48.46 percent over the period 2014-2019.

Cloud security software offers security to cloud-based services or cloud computing architectures. Cloud security software can be standalone solution or a suite of products. It focuses on key parameters such as data protection, compliance, architecture, governance, as well as identity and access. A typical cloud security solution offers features such as encryption, IAM, endpoint monitoring, vulnerability scanning, intrusion detection, and application and messaging security. Cloud security software helps in protecting the cloud content from unauthorized access and theft of data.
