PUNE, INDIA, December 19, 2016

/EINPresswire.com/ --

The analysts forecast [the life insurance market](#) in Southeast Asia to grow at a CAGR of 7.71% during the period 2016-2020.

The 2007 financial crisis shattered many economies across the globe, and triggered a negative shift in customer demand, especially in the life insurance sector. The drop in income not only reduced demand for life insurance policies and products but also curtailed the market penetration of the industry. In the current market scenario, there are many product portfolios offered by the top life insurance vendors. With this scenario in place, the demand for life insurance policies is calculated on the basis of the rate at which transparent products are being provided by vendors to customers.
