

Etihad Airways, IATA, Air France, Turkish Airlines, Jet Airways and more to gather in Dubai in March

Total revenues from passenger connectivity services are expected to grow from \$700 million in 2015 to nearly \$5.4 billion by 2025.

DUBAI, UNITED ARAB EMIRATES, December 20, 2016 /EINPresswire.com/ -- Passenger demand for connectivity solutions is increasing and airlines are being forced to implement IFC solutions across their fleets in order to remain competitive and keep up with rising demand.

Higher speed broadband and the development of HTS satellite will soon bring down the cost of IFC services. The economics of HTS should enable lower prices for consumers, and increase adoption of free connectivity business models, meaning airlines will have to adopt IFC if they wish to remain competitive.

In light of this, IQPC is hosting the Connected Aircraft Conference taking place from 7-8 March 2017 in Dubai, UAE, to bring together leading airlines, OEMs, satellite providers, service providers and regulatory bodies. The conference will address how advances in connectivity can be leveraged to better inform maintenance strategies, flight paths and navigation for increased fuel savings, better fleet monitoring and airline safety.

Some of the speakers include:

- Christopher Michael James Bigwood, Manager Innovation Programs, Etihad Airways
- John Synnott, Manager, Flight Operations Information Technology, IATA
- Dr. Jassim Haji, CIO, Gulf Air
- Marc Christian Reichle, Senior Manager Configuration Control & e-Enabling, Etihad Airways
- Christopher Burger, Head of Technology and Innovation, Etihad Airways
- Marc Mautref, Pilots and Aircraft Connectivity Manager, Air France
- Serdar Gürbüz, Digital Innovation Manager, Turkish Airlines
- Dharmesh K Jina, Manager - IFE and FRS, Guest Experience, Jet Airways
- Babar Rahman, Head of Global Sponsorships CSR and In-Flight Connectivity, Qatar Airways
- Dr. Dymitr Ruta, Chief Researcher, Big Data Analytics - Group Leader, EBTIC, Khalifa University
- And many more...
