WiseGuyReports.Com Publish a New Market Research Report On – “VoIP Market 2016:Competitor,Share,Demand,Applications,Opportunities & Forecasts to 2021”.

PUNE, INDIA, December 20, 2016
/EINPresswire.com/ --

[Voice over Internet Protocol \(VoIP\)](#), is a technology that allows you to make voice calls using a broadband Internet connection instead of a regular (or analog) phone line. Some VoIP services may only allow you to call other people using the same service, but others may allow you to call anyone who has a telephone number - including local, long distance, mobile, and international numbers. Also, while some VoIP services only work over your computer or a special VoIP phone, other services allow you to use a traditional phone connected to a VoIP adapter.

Scope of the Report:

This report focuses on the VoIP in Global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.
