

New toolkit bolt-ons allow businesses with existing ITGP toolkits to integrate their management systems

ELY, CAMBRIDGESHIRE, UNITED KINGDOM, December 20, 2016 /EINPresswire.com/ -- – IT Governance, the leading provider of compliance solutions and information security expertise, is delighted to announce the launch of its new toolkit bolt-ons, which allow organisations with existing ITGP documentation toolkits to cost-effectively integrate their management systems.

The three new toolkit bolt-ons help organisations integrate their existing management systems with ISO 14001 (environmental management), ISO 9001 (quality management) and ISO 27001 (information security).

Alan Calder, the founder and executive chairman of IT Governance, said: “These bolt-on toolkits allow organisations to implement an integrated management system that consolidates all business compliance areas into one comprehensive system. They also allow businesses to streamline processes and operations while meeting business objectives.”

Each documentation toolkit bolt-on includes gap analysis and dashboard tools to help compliance teams strengthen their projects and compare their current state of compliance with the requirements of their chosen standard.

Organisations that wish to add to their current management system can take advantage of the following IT Governance documentation toolkit bolt-ons:

- The [ISO 27001 ISMS Documentation Toolkit Bolt-on](#) allows organisations to develop their existing management system to become compliant with ISO 27001, improving business efficiency by streamlining processes and procedures.
- The [ISO 14001 EMS Documentation Toolkit Bolt-on](#) helps businesses to integrate ISO 14001 documentation with their current management system and control the environmental impact of their products, services and activities.
- The [ISO 9001 QMS Documentation Toolkit Bolt-on](#) helps integrate ISO 9001 documentation into an existing management system and demonstrate continual improvement and business efficiency.

The bolt-on toolkits remove the need for repeat customisation by allowing organisations to automatically import their existing information from the ‘User Input’ sheet. The toolkits also include gap analysis and conversion tools in line with the latest versions of the chosen Standards.

To find out how IT Governance's documentation toolkit bolt-ons can help your organisation implement an integrated management system, please visit the website, email servicecentre@itgovernance.co.uk or contact the team direct on +44 (0)845 070 1750.
