Summary

Pharmaceutical and Healthcare disease pipeline guide [Liver Failure](#) (Hepatic Insufficiency) – Pipeline Review, H2 2016, provides an overview of the Liver Failure (Hepatic Insufficiency) (Gastrointestinal) pipeline landscape.

Liver failure is severe deterioration of liver function. Liver failure occurs when a large portion of the liver is damaged due to any type of liver disorder. Symptoms may include jaundice, tendency to bruise or bleed easily, ascites, impaired brain function (encephalopathy), poor weight gain and growth, fatigue, weakness, nausea and loss of appetite. Since these symptoms are associated with a host of other conditions, it may take some time before the correct diagnosis is made. As liver failure worsens, people may experience disorientation and drowsiness. At this stage, there is a risk of coma and death.

Report Highlights

Pharmaceutical and Healthcare latest pipeline guide Liver Failure (Hepatic Insufficiency) – Pipeline Review, H2 2016, provides comprehensive information on the therapeutics under development for Liver Failure (Hepatic Insufficiency) (Gastrointestinal), complete with analysis by stage of development, drug target, mechanism of action (MoA), route of administration (RoA) and molecule type. The guide covers the descriptive pharmacological action of the therapeutics, its complete research and development history and latest news and press releases.

The Liver Failure (Hepatic Insufficiency) (Gastrointestinal) pipeline guide also reviews of key players involved in therapeutic development for Liver Failure (Hepatic Insufficiency) and features dormant and discontinued projects. The guide covers therapeutics under Development by Companies /Universities /Institutes, the molecules developed by Companies in Phase III, Phase II, IND/CTA Filed, Preclinical and Discovery stages are 2, 4, 1, 7 and 1 respectively. Similarly, the Universities portfolio in Preclinical stages comprises 5 molecules, respectively.

Liver Failure (Hepatic Insufficiency) (Gastrointestinal) pipeline guide helps in identifying and tracking emerging players in the market and their portfolios, enhances decision making capabilities and helps to create effective counter strategies to gain competitive advantage. The guide is built using data and information sourced from proprietary databases, company/university websites, clinical trial registries, conferences, SEC filings, investor presentations and featured press releases from company/university

sites and industry-specific third party sources. Additionally, various dynamic tracking processes ensure that the most recent developments are captured on a real time basis.

Scope

- The pipeline guide provides a snapshot of the global therapeutic landscape of Liver Failure (Hepatic Insufficiency) (Gastrointestinal).
- The pipeline guide reviews pipeline therapeutics for Liver Failure (Hepatic Insufficiency) (Gastrointestinal) by companies and universities/research institutes based on information derived from company and industry-specific sources.
- The pipeline guide covers pipeline products based on several stages of development ranging from pre-registration till discovery and undisclosed stages.
- The pipeline guide features descriptive drug profiles for the pipeline products which comprise, product description, descriptive licensing and collaboration details, R&D brief, MoA & other developmental activities.
- The pipeline guide reviews key companies involved in Liver Failure (Hepatic Insufficiency) (Gastrointestinal) therapeutics and enlists all their major and minor projects.
- The pipeline guide evaluates Liver Failure (Hepatic Insufficiency) (Gastrointestinal) therapeutics based on mechanism of action (MoA), drug target, route of administration (RoA) and molecule type.
- The pipeline guide encapsulates all the dormant and discontinued pipeline projects.
- The pipeline guide reviews latest news related to pipeline therapeutics for Liver Failure (Hepatic Insufficiency) (Gastrointestinal)

Reasons to buy

- Procure strategically important competitor information, analysis, and insights to formulate effective R&D strategies.
- Recognize emerging players with potentially strong product portfolio and create effective counter-strategies to gain competitive advantage.
- Find and recognize significant and varied types of therapeutics under development for Liver Failure (Hepatic Insufficiency) (Gastrointestinal).
- Classify potential new clients or partners in the target demographic.
- Develop tactical initiatives by understanding the focus areas of leading companies.
- Plan mergers and acquisitions meritoriously by identifying key players and it's most promising pipeline therapeutics.
- Formulate corrective measures for pipeline projects by understanding Liver Failure (Hepatic Insufficiency) (Gastrointestinal) pipeline depth and focus of Indication therapeutics.
- Develop and design in-licensing and out-licensing strategies by identifying prospective partners with the most attractive projects to enhance and expand business potential and scope.
- Adjust the therapeutic portfolio by recognizing discontinued projects and understand from the know-how what drove them from pipeline.
