PUNE, INDIA, December 23, 2016 /EINPresswire.com/ --

The analysts forecast the <u>global stainless steel</u> <u>market</u> to grow at a CAGR of 5.65% during the period 2016-2020.

Stainless steel is an iron-based alloy containing at least 10.5% chromium by mass. In order to enhance its properties, other alloys like nickel, titanium, columbium, and molybdenum can also be added during melting. Stainless steel is resistive to corrosion, rust, and stain with water unlike ordinary steel, due to which it is used in a number of industries like household appliances, construction, automobiles, and machinery. We expect the global stainless steel market to post a CAGR of 5.24% during the forecast period.
