Downstream market analysis

Dietary fiber has many health benefits. It can reduce risk of heart disease, diabetes cancer and

also help to control the weight. The major consumer of dietary fiber are sportsperson, athletes and young adults. Intake of soluble dietary fiber benefit patients with diabetes mellitus and hyperlipidemia. Dietary fiber is majorly used in functional food as an ingredient as it provide water holding capacity, viscosity, gel-forming ability and fat-binding capacity to food products.

Companies are focusing on marketing and branding to promote benefits of dietary fiber to consumer. The major problems faced by players in this market is to comply with FDA regulations, which ask companies for a proof of claims produced on packaging labels. The future scope for companies to focus on R&D and innovate the products and practices in order to meet consumer preferences and to maintain production cost.

Test the market data and market information presented through more than 50 market data tables and figures spread over 110 numbers of pages of the project report. Avail the in-depth table of content TOC & market synopsis on "[Global Dietary Fiber Market Research Report- Forecast to 2022](#)"

Regional Analysis

The global dietary fiber market is segmented into North America, Europe, Asia Pacific, and Rest of the World (RoW). Amongst these, the North America holds largest market share followed by Europe. The low fiber content in American diet has boosted the dietary fiber market in North America. APAC is fastest growing region due to changing lifestyle and improved disposable income in that region. The consumption of dietary fiber in developing countries like India, Brazil and China is expected to grow in upcoming years.
