Summary

Global [Security Testing](#) Market is accounted for \$2.8 billion in 2015 and expected to grow at a CAGR of 19.9% to reach \$9.98 billion by 2022. Factors such as need for protection against cyber security threats, increased need for Cloud based security solution and protection for Web & Mobile applications are driving the market growth. However, lack of domain related tools, more implementation cost for innovation & deployment affects the business and limited knowledge & skills about security testing domain will hamper market growth. Connected devices and BYOD trends will provide ample opportunity for the market growth.

Application security testing segment is projected to grow with highest CAGR value. Web testing tool segment commanded the largest market share due to ongoing attacks software and hardware applications. Banking, Financial Services, and Insurance (BFSI) end user segment is fastest growing market due to wide use of mobile and web based solutions. Asia Pacific is the fastest growing market due to higher adoption of security based applications. North America is the largest market followed by Europe in terms of revenue.
