The analysts forecast the global UV stabilizers market to grow at a CAGR of 6.9% during the period 2017-2021.

Ultraviolet (UV) stabilizers are used to protect materials from the long-term UV degradation effects caused due to UV radiation. Various UV stabilizers are used depending on the substrate, intended functional life, and sensitivity to UV degradation. Owing to constant exposure to sunlight, materials tend to exhibit photodegradation changes such as color change, chalking, cracking, and the loss of physical properties. In order to respond to the harmful effect of UV light, UV stabilizers are used to solve the degradation problems caused due to exposure to sunlight.

Covered in this report

The report covers the present scenario and the growth prospects of the global UV stabilizers market for 2017-2021. To calculate the market size, the report considers the revenue generated from the sales of UV stabilizers.

The market is divided into the following segments based on geography:

- APAC
- Europe
- North America
- ROW

The report, Global UV Stabilizers Market 2017-2021, has been prepared based on an in-depth market analysis with inputs from industry experts. The report covers the market landscape and its growth prospects over the coming years. The report also includes a discussion of the key vendors operating in this market.

Key vendors

- BASF
- Clariant
- Cytec Solvay Group
- Evonik Industries
- SONGWON

Complete Report Details @ <https://www.wiseguyreports.com/reports/855006-global-ultraviolet-stabilizers-market-2017-2021>

Other prominent vendors

- Addivant
- Everlight Chemical Industrial
- Lycus
- Mayzo

Market driver

- Growing demand from plastics, coatings, and construction industries
- For a full, detailed list, view our report

Market challenge

- Compliance with strict safety and environmental requirements
- For a full, detailed list, view our report

Market trend

- Increasing demand from emerging economies
- For a full, detailed list, view our report

Key questions answered in this report

- What will the market size be in 2021 and what will the growth rate be?
- What are the key market trends?

- What is driving this market?
- What are the challenges to market growth?
- Who are the key vendors in this market space?

Table of Contents

PART 01: Executive summary

PART 02: Scope of the report

- Market overview
- Market size calculation

PART 03: Market research methodology

- Research methodology
- Economic indicators

PART 04: Introduction

- Key market highlights
- Outlook
- UV stabilizers mechanism

PART 05: Market landscape

- Market size and forecast
- Five forces analysis

PART 06: Market segmentation by application

- Global UV stabilizers market by application
- Global UV stabilizers market for flooring and decking applications
- Global UV stabilizers market for furniture applications
- Global UV stabilizers market for automotive coating applications
- Global UV stabilizers market for packaging applications
- Global UV stabilizers market for other applications

PART 07: Market segmentation by type

- Market segmentation by type
- Global UV stabilizers market by HALSs
- Global UV stabilizers market by UV absorbers
- Global UV stabilizers market by quenchers

PART 08: Geographical segmentation

- Global UV stabilizers market by geography
- UV stabilizers market in APAC

- UV stabilizers market in Europe
- UV stabilizers market in North America
- UV stabilizers market in ROW

PART 09: Market drivers

- Rising awareness about harmful effects of UV light on plastics
- Growing demand from plastics, coatings, and construction industries
- Increasing R&D and new product launch activities by key players

PART 10: Impact of drivers

PART 11: Market challenges
