

Vicon Announces New Valerus VMS Is Now Available

The release of Vicon's Valerus VMS promises to be a revolutionary tool in the security industry.

HAUPPAUGE, NY, UNITED STATES, January 5, 2017 /EINPresswire.com/ -- Hauppauge, NY: (Jan. 5, 2017) [Vicon Industries, Inc.](#) (VII: NYSE-MKT) ("Vicon"), trusted designer and producer of video security systems and high-performance IP cameras, announced the release of its new next-generation video management software, Vicon [Valerus](#). Glowing reviews during beta testing indicates that this unique, browser-based system promises to be a revolutionary tool in the security industry.

The advanced simplicity of Vicon's Valerus software was built on today's true open standards in order to optimize interoperability. This easy-to-install and use software offers thin client architecture and central licensing, providing ground-breaking steps toward the future of security solutions. Based on years of experience in the security market and a look forward to the future, Vicon's new platform supports today's conventional network systems and is ready for the expanding world of cloud computing.

“

Vicon's Valerus is finally here. This revolutionary software brings a whole new level of user experience and underscores our commitment to offer a platform of true standards-based products. ”

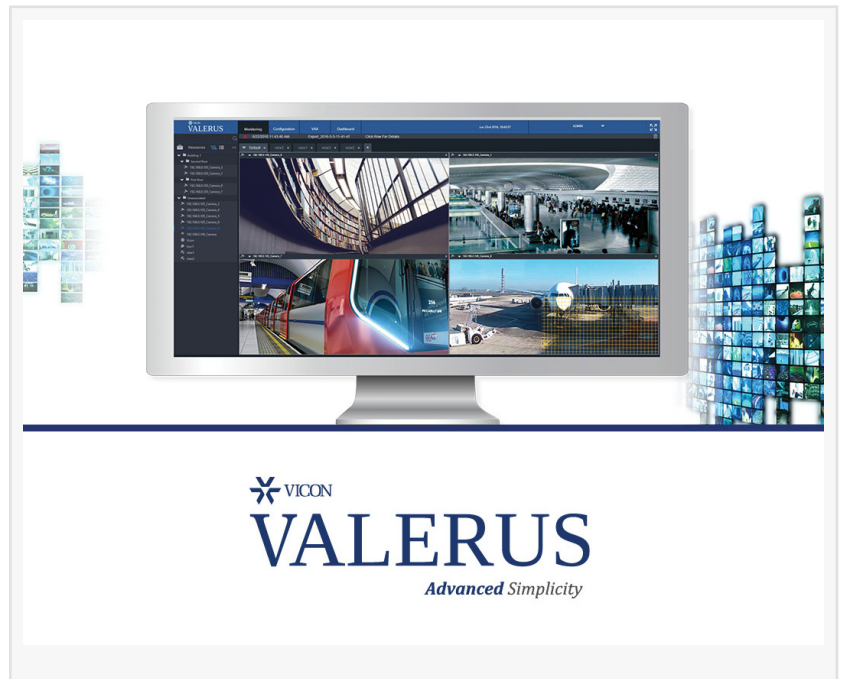

Bret McGowan, VP of Sales

and web-based access from anywhere designed to handle all types of security demands
Simple and cost-effective pricing model combined with optional upgrade protection plan ensures long-term value

Offers comfort of real choice with third-party integration compatibility through ONVIF

Single license activates all Valerus components—including cameras, recording servers and clients
Available as software only or installed on factory approved hardware—offers flexibility in system design

Simplifies security operations with central dashboard that provides health notifications to quickly

resolve issues

Increases operational efficiency with quick configuration tool and centralized management

Provides unparalleled HD image quality and intelligently manages bandwidth and storage

Bret McGowan, Vicon's Sr. VP Sales & Marketing, states, "Vicon's Valerus is finally here and we look forward to sharing our new software with the entire

security industry. This revolutionary video management software brings a whole new level of ease of installation and user experience and underscores our commitment to offer true standards-based products. Valerus is a system you can invest in today and be confident it will be your solution into the future."
