

# ITGP releases documentation toolkit bolt-ons to help organisations integrate management systems

ELY, CAMBRIDGESHIRE, UNITED KINGDOM, January 10, 2017 /EINPresswire.com/ -- IT Governance, the leading provider of compliance solutions and information security expertise, is encouraging organisations to save time and money implementing multiple Annex SL-aligned ISO management systems by using ITGP's documentation toolkit bolt-ons.

ITGP toolkit bolt-ons help organisations implement their integrated management system (IMS) by using a phased, modular approach, which reduces room for error and avoids duplicating documentation. The toolkits include tools to provide project owners with a complete overview of the IMS project.

The ITGP standalone toolkits include the tools and resources for a single management system, and each of the new bolt-on toolkit provides the additional documents and guidance needed to integrate the original management system with another Annex SL-aligned management system.

Alan Calder, the founder and executive chairman of IT Governance, said: "The ITGP bolt-on toolkits allow organisations to implement an integrated management system that consolidates all business compliance areas into one comprehensive system that can be easily updated and managed."

Organisations that wish to expand their current management system can take advantage of ITGP's [ISO 14001:2015 EMS Documentation Toolkit Bolt-on](#), [ISO 9001:2015 QMS Documentation Toolkit Bolt-on](#) and the [ISO 27001:2013 ISMS Documentation Toolkit Bolt-on](#).

The documentation toolkit bolt-ons include gap analysis and dashboard tools to help the compliance team track and strengthen their projects. It also gives the project owner the ability to compare the current state of compliance with their chosen standard.

An IMS combines all business components in one coherent system, streamlining process management and operations, meeting business objectives and providing organisations with:

- A common approach to compare risks that occur within different organisational divisions;
- Regulation management applicable to your organisational and departmental needs;
- A framework for training support and awareness programme;
-
