

Global Database Management System Market is expected to grow at USD 63 billion with CAGR of 8% from 2016-2022

Global Database Management System Market is majorly driven by factors such as high adoption of cloud computing and need of efficient data management systems.

PUNE, MAHARASHTRA, INDIA,
January 11, 2017 /EINPresswire.com/ --
Market Highlights

Database Management System is one of computer software application that interacts with the user, capture and analyzes data. Some of the factors such as improved data sharing, data security, backup and recovery, among others are driving the global market of database management systems. DBMS helps to manage data efficiently and allows users to perform multiple tasks easily such as retrieval of data, sharing and transfer. Due to increased security proliferation, organizations are upgrading their traditional data management systems and investing heavily in the field of R&D and DBMS to protect and safeguard confidential information.

The need of deployment such as Cloud-based solution showing rapid growth in recent years and is expected to be a primary driver over the forecast period due to its low cost and benefit, however, factors such as high cost of components as well as appointment of technical staff are some of the major restraints which is likely to hamper the market growth over the period of time.

Market Research Analysis:

Market Research Future analysis show that the global market of database management system is estimated to reach at US ~\$63 billion by the end of forecasted period. Growing industrialization in Asian countries and high adoption of technology in the business process are pushing the [DBMS Market](#). For the purpose of this study, Market Research Future has been segmented on the basis of has been segmented on the basis of components, types, deployment and industry. By region North America is expected to account for largest share followed by Europe. Asia-Pacific has emerged as fastest growing sector due to the changing business environment of Asian Countries and government initiatives in order to bring international players in this region. The global database management system market is expected to grow at CAGR of ~8%.

Intended Audience

- Database Service Providers
- Database Management Companies
- Cloud Service Providers
- Cloud Computing Companies
- Software Development Companies
- Hardware Suppliers And Distributors
- Software Distributors
- Software Developer
- Government
