While in the solar segment of the water heater market the story takes a turn where the market is firmly in the hands of Un-organized manufacturers or local manufacturers, thanks to the cheaper Chinese imports. The un-organized players takes the benefit of the price sensitive customers as the basic models they have to offer in the solar segment costs roughly around INR 8500 that is almost half the price as compared to the branded one that goes up to INR 15000. The established players in the segment are Emmvve, Anu Solar, Tata BP and V-Guard which has minimal share in the market as compared to the local manufacturers.

The electric water heaters is the dominant market as it comes with low ownership cost and lower maintenance, is forecasted to dominate the market in the nearer future. Solar waters have started picking up slowly due to the continuous efforts from the Government and increased awareness amongst the customers to opt for environment friendly products. The factor that dents the solar segment is high cost of ownership from the organized market and lower quality from the un-organized market that in turn increases the maintenance cost. With innovations going in the industry will offer the bunch of products that will be able to cater the needs of the customers.
