The analysts forecast the global [light-emitting diode lighting module](#) market to grow at a CAGR of 19.95% during the period 2017-2021.

LED lamps consist of two semiconductor diodes, which produce light. They do not contain any mercury and emit almost negligible UV or infrared rays that are converted to white light by the phosphors content in it. Thus, these are environment friendly. These are also resistant to shock and vibration and produce very little heat. It has a life span of almost 50,000 hours, which is much longer than other types of bulbs.

Covered in this report

The report covers the present scenario and the growth prospects of the global light-emitting diode lighting module market for 2017-2021. To calculate the market size, the report considers the revenue generated from the sales of LED lighting modules across the several end-user segments, which includes architectural, hospitality, industrial, office, outdoor, residential, and retail.

The market is divided into the following segments based on geography:

- Americas

- APAC
- EMEA

The report, Global Light-Emitting Diode Lighting Module Market 2017-2021, has been prepared based on an in-depth market analysis with inputs from industry experts. The report covers the market landscape and its growth prospects over the coming years. The report also includes a discussion of the key vendors operating in this market.

Key vendors

- Cree
- GE Lighting
- OSRAM
- Philips

Complete Report Details @ <https://www.wiseguyreports.com/reports/872291-global-light-emitting-diode-lighting-module-market-2017-2021>

Other prominent vendors

- Acuity Brands
- Advanced Lighting Technology
- Bridgelux
- Cooper Lighting
- LG Innotek

Market driver

- Demand for energy-efficient lighting solutions
- For a full, detailed list, view our report

Market challenge

- Lack of standardization
- For a full, detailed list, view our report

Market trend

- Increase in urban population worldwide
- For a full, detailed list, view our report

Key questions answered in this report

- What will the market size be in 2021 and what will the growth rate be?
- What are the key market trends?
- What is driving this market?
- What are the challenges to market growth?

- Who are the key vendors in this market space?

Table of Contents

PART 01: Executive summary

PART 02: Scope of the report

- Market overview
- Definition of end-user segments
- Other definitions
- Top-vendor offerings
- Geographical segmentation

PART 03: Market research methodology

- Research methodology
- Economic indicators

PART 04: Introduction

- Key market highlights
- Technology landscape

PART 05: Market landscape

- Market overview
- Market size and forecast
- Five forces analysis

PART 06: Market segmentation by end-user

- Global LED lighting module market in retail sector
- Global LED lighting module market in architectural sector
- Global LED lighting module market in office sector
- Global LED lighting module market in hospitality sector
- Global LED lighting module market in industrial sector
- Global LED lighting module market in outdoor sector
- Global LED lighting module market in residential sector

PART 07: Market segmentation by application

- Global LED lighting module market by LED luminaires
- Global LED lighting module market by LED lamps

PART 08: Geographical segmentation

- LED lighting module market in APAC
- LED lighting module market in EMEA

- LED lighting module market in Americas

PART 09: Market drivers

- Government support and incentives for LED lighting
- Demand for energy-efficient lighting solutions
- Upcoming mega events and infrastructure projects
- Inception of energy-efficiency certification programs
- Minamata Convention on Mercury

PART 10: Impact of drivers
