Market Research Future Analysis:

Market Research Future analysis shows that the global market of digital banking is estimated to grow at compound annual growth rate of ~8 % between forecast years. High adoption of cloud based services by the major banks around the world and increasing the number of internet and mobile phone consumers are playing role of major growth factor. In the regional market, North America is leading the market due to the high growth of on cloud adoption in banking and other BFSI industries. Also presence of technology and service providers in U.S. and Canada is giving competitive advantage to North America. Europe and Asia-Pacific digital banking market is expected to grow rapidly due to the green initiative by the government and owing to high number of smartphone users in this region.
