

PrimaveraReader Brings New Features for Project Organizations

Introducing Baselines and Auto Filters as some of the new features in PrimaveraReader 3.1

MALMOE, SWEDEN, January 16, 2017 /EINPresswire.com/ -- After the successful introduction of the first [.xer and .xls reader](#) for Mac OS X, PrimaveraReader continues to offer new and valuable features for improving project team efficiency and product usability. The new PrimaveraReader 3.1 has Baselines, Auto Filters, Encoding in different languages, set Date formats and Collapse to WBS level.

"We are following market needs and customer requests coming from different industries working with Oracle® Primavera P6. For 2017 we have planned a fruitful roadmap of new releases that will bring great usage benefits to our clients and expand our features portfolio." - Stojan Ganchev, R&D Manager.

Most of our client organizations have completely replaced the flow of sending their Project Schedules in PDF files to their teams and replaced the flow with opening the native .xer file in PrimaveraReader.

New features

Baseline comparison of different project versions

Easy visual comparison of the Activity updates from previous .xer file version. This way the user automatically sees the difference in bars, charts and what has been changed in the Project Schedules. It allows comparison of up to four different project versions by simply importing them where the software automatically compares by Activity ID. video.

Auto Filters

Auto filtering allows users to filter data in one or more columns based on the cell contents. The user can select values from a list in order to control which activities to see or to exclude from the current schedule view.

Key product features:

- Complete preview of project data from .xer and .xls files.
- Import custom layouts and user defined filters.
- Display WBS, EPS and OBS views.
- Resource Assignments.
- Baseline comparison.
- Dedicated customer support.

PrimaveraReader allows users to [open and view project data](#) exported from Oracle® Primavera P6 in .xer or .xls file formats. PrimaveraReader is designed to deliver the well-known view of project information among all parties involved, providing quality of data, interactive views and complete preview of data. PrimaveraReader is applicable to all project oriented organizations, from smaller projects to large scale project and portfolio oriented enterprise corporations and is available for Windows and Mac OSX platforms.

Interested parties can schedule a [free demo session](#) for further details, or download a free 15 day trial.
