PUNE, INDIA, January 17, 2017

/EINPresswire.com/ -- The [E-waste management](#)

market is one of the rapidly growing markets in recycling sector in India. Due to increasing standard of living and changing lifestyle, the demand for technical devices is become an issue for India E-waste management industry where the proper disposal and recycling of E-waste is a big concern against the continuous generation of E-waste in the country. In India, E-Waste management and recycling market faces major challenges due to lack of proper regulatory interface and supporting infrastructure. The large household appliances, Information Technology and

Telecommunications sectors are the primary

source of E-Waste generation in the country. Moreover, as the technology advances, lifespan of products is becoming shorter which causes replacement of existing products with the new models, which turns into the further increasing generation of E-Waste.
