PUNE, INDIA, January 18, 2017 /EINPresswire.com/ -- [Global Bus Rapid Transport Systems \(BRT\) Market](#)

BRT systems are highly sophisticated bus-based transit systems that are meant to deliver efficient, rapid, and cost-effective high capacity public transportation services. Apart from vehicles, BRT systems also comprise right-of-way lanes, on-board ITS, and stations. They use hi-tech communication technologies to track the location of vehicles and provide timely information to passengers at stations. Apart from saving on travel time, they also provide certain advantages such as reduction in emission levels, road safety, and encourage the use of public transportation. These systems are expected to evolve and shift toward using clean fuels such as biodiesel, LPG, and CNG rather than diesel.

Covered in this report

The global BRT systems market can be divided into two segments based on the type of powertrain: diesel-based and alternative-fuel based. The key end-customers of BRT systems are state governments and municipal corporations.
