WiseGuyReports.Com Publish a New Market Research Report On – “Industrial Data Acquisition Systems 2017 Global Market Expected to Grow at CAGR 5.36% and Forecast to 2021”.

The analysts forecast the global industrial data acquisition systems market to grow at a CAGR of 5.36% during the period 2016-2020.

[Data acquisition systems collect](#) data from field devices like sensors or transmitters on parameters such as temperature, voltage, current, sound, and pressure through a wired or wireless network. With powerful microprocessors, standalone data acquisition systems (which can perform data acquisition more efficiently) have emerged in the market. These systems are used in extreme environmental conditions, such as in temperature controlled chambers.

The advances in wireless connectivity, such as LTE, WLAN 802.11ac, Bluetooth 4.0, and 4G, have led to a rise in adoption of wireless technologies and the development of inbuilt mobile data acquisition systems and wireless data acquisition systems. The need to measure the temperature or pressure of devices used in remote locations have paved the way for the development of data acquisition systems. The demand for these systems will drive market growth during the forecast period.
