

Valerus VMS Configuration is Incredibly Easy

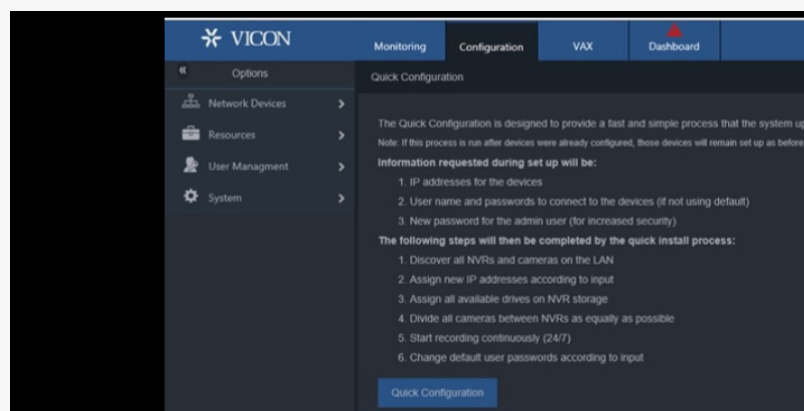

Average deployment in under 5 minutes

HAUPPAUGE, NY, USA, January 18, 2017 /EINPresswire.com/ -- Hauppauge, NY: (Jan. 18, 2017) Vicon Industries, Inc. (VII: NYSE-MKT) ("Vicon"), trusted designer and producer of [video](#) security systems and high-performance IP cameras, reveals that the configuration and deployment with Vicon's new [Valerus](#) VMS takes only 5 minutes on average. Recording Servers (NVRs), cameras and encoders and other resources are quickly discovered, added, configured and operated using the Quick Configuration wizard in the application. And with a single license, any changes made to cameras or recording devices do not change the license. Watch the demo video for more information about manually setting up configuration in Valerus.

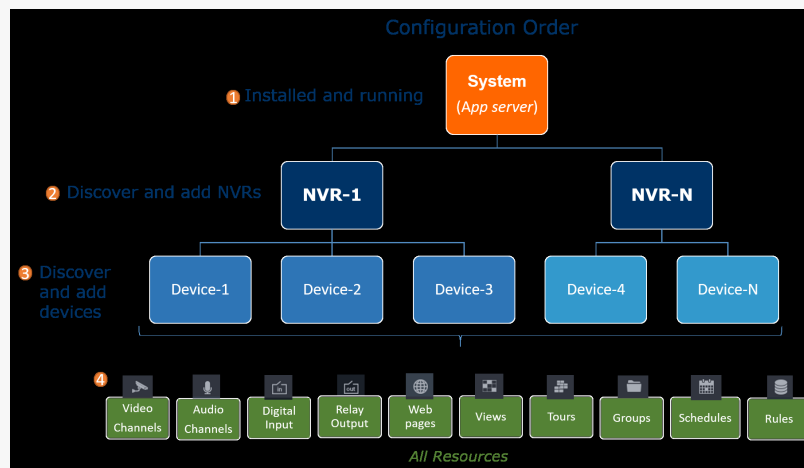

Through Quick Configuration, the server will search and find all devices that are on the same LAN as the Application Server. This valuable feature allows you to:

- Automatically detects NVRs and cameras
- Assigns IP addresses
- Automatically change passwords to devices for enhanced security
- Assign all available drives on NVRs for storage
- Automatically divides cameras between NVRs as equally as possible
- Starts recording video continuously (24/7) by default
- Program all NVRs from a single location and interface

Vicon is excited to demo their new

Wizard for quick configuration

 **VALERUS**
Advanced Simplicity

Valerus release for the first time at Intersec next week. So stop by Stand No. J09, Hall S1 or start your 30-day FREE [trial](#) to start saving time and installation costs through this streamlined process.
