

TraceGains Launches Major Software Upgrade with its Seventh Version

DENVER, COLORADO, UNITED STATES, January 30, 2017

/EINPresswire.com/ -- TraceGains, the leading Food Safety and Quality Assurance (FSQA) software solution for food and consumer packaged goods (CPG) companies, today announced a

major upgrade for the company's cloud-based solutions. TraceGains customers already have the food industry's most advanced document, compliance, and quality management solutions, and now with Version 7, TraceGains offers improved user interface, superior mobile functionality, and improved overall performance and scalability by putting new dashboards and grids at users' fingertips.

“

With our Version 7 advancements, our Research & Development team has further demonstrated our company's commitment to continuous improvement.”

TraceGains' CEO Gary Nowacki

“With our Version 7 advancements, our Research & Development team has further demonstrated our company's commitment to continuous improvement, said Gary Nowacki, TraceGains' CEO. “Not only does TraceGains have a fresh new look and feel, it gives our customers easier access to the right information and greater data analytics that will help them reach the next level on food safety and quality.”

Customers who have already migrated to Version 7 have high praise for the software update. Quality Assurance Manager for Mullins Food Products Jamie Krystofiak admitted initially

feeling leery about switching because she was so comfortable with TraceGains prior version. She commented, “As usual, my expectations were exceeded. It is so user friendly and I can really tell that you have listened to your customers' requests when designing the update. Bravo on Version 7!”

“The new version of TraceGains seems to be very user friendly and simple to explain to new users,” said Jason Trudeau, the Vendor QA Supervisor for DairiConcepts, L.P. “My company is granting access to different departments for various different reasons and the feedback I am receiving is that people are finding it very useful and easy to find what they are looking for. V7 is also making it easier to bridge the gap between corporate and the individual plants within the company.”

According to TraceGains Supplier Success Manager Shawn Sanders, it's not just TraceGains' customers who benefit from the software upgrade, suppliers who do business with TraceGains customers are also benefiting, especially since connecting on TraceGains Network is free for suppliers. He commented, “When suppliers realize how much time TraceGains Network saves them because they can share supplier documents with all of their customers who use TraceGains with just a few mouse clicks, they get pretty excited. It results in real collaboration and anything that simplifies life for suppliers and boosts compliance is a good thing for our customers.”

Red Arrow Products' Regulatory Affairs & Ingredient Specialist Joshua DeWitt described his

company's reaction to the software upgrade. "Red Arrow Products appreciates the software's new features. It allows us to be more in tune to our customers' document and information needs and allows us to be very proactive in getting critical information to them quickly," said Mr. DeWitt, "TraceGains is a great company to partner with."

Dave Barnes of Bunge Milling shared his reaction the upgraded system. He said, "Overall, I like the look and feel of TraceGains Network and appreciate the intelligent design in the site."

Some of the new features and enhancements included in TraceGains Version 7 are:

- Improved user interface
- Superior mobile functionality
- Greater flexibility and configuration
- Streamlines task-oriented interface for suppliers
- New customizable dashboards give users even more dynamic ways to examine data
- New cascading capabilities that allow capturing the right data based on previous responses
- More languages than ever before including: English, Spanish, French, Japanese, Arabic, Russian, Mandarin and Italian. Additional language support will be added soon.

TraceGains has done months of testing and is in the process of migrating all customers from Version 6 to Version 7 over the next few months.

About TraceGains

TraceGains' cloud-based SAAS solution provides food and CPG companies with an integrated quality, supplier, compliance, and regulatory document management system that eases compliance with [FSMA](#), [GFSI](#), and HACCP. By automating, innovating, and streamlining Food Safety and Quality Assurance, TraceGains' customers are 365 Audit Ready™ and the system typically pays for itself in only four to six months.

TraceGains is the winner of the 2016 Stratus Award for Cloud Collaboration. The company is also among the Food Logistics Top 100 software and technology providers and was named a Top 20 Information Technology Firm by ColoradoBIZ magazine.
