

Winter Tire in Belgium Market Share,Trend,Demand and Market Analysis Report Forecast To 2019

Wiseguyreports.Com Publish New Market Research Report On-"Winter Tire in Belgium Market Share,Trend,Demand and Market Analysis Report Forecast To 2021".

PUNE, INDIA, January 19, 2017
/EINPresswire.com/ -- [Winter Tire](#) Market in Belgium

The analysts forecast the winter tire market in Belgium to grow at a CAGR of 1.85 percent over the period 2014-2019.

Winter tires, also referred to as snow tires, cold weather tires, and thermal tires, improve the road safety for vehicles during winter, and thus play an important role in reducing road accidents. These tires are made of soft rubber compared to the all-season or summer tires, which help achieve better grip during winters.

Furthermore, the newer generation of winter tires is designed with a more flexible rubber compound that is less prone to stiffening in colder temperatures. Its tread is designed to provide improved traction on wet, slushy, snowy, icy, and dry cold surfaces. Winter tires are fitted in sets of four, because fitting only a pair affects the balance and stability of the automobile. Winter tires are of three types: performance, studded, and non-studded.
