PUNE, INDIA, January 19, 2017  
/EINPresswire.com/ --

The analysts forecast the [global maritime information market](#) to grow at a CAGR of 9.39% during the period 2016-2020.

The global maritime information market involves providing data, information, and applications required to understand events that are occurring in the maritime environment. It caters to the government and commercial sectors and analytics solution providers.

The users of maritime information gather data in order to have safety at sea, improve productivity, and ensure efficiency in marine operations. Maritime information ensures regulatory compliance, enhances situational awareness, delivers scientific and survey data, and monitors the environment for suspicious or illegal actions. The concerns regarding maritime border security, human trafficking, piracy, and environmental impacts (activities such as dumping or oil spills) are increasing the need for accurate on-time information to monitor maritime shipping activities worldwide.
