The Global Stroke Diagnostics and Therapeutics Market is categorized by type, application and geography. By type, the market is segmented into Diagnostics and Therapeutics. The Diagnostics is sub categorized into Magnetic Resonance Imaging (MRI), Computed Tomography Scan (CT scan), Electrocardiography, Carotid Ultrasound, Cerebral Angiography and Others. The Therapeutics is sub segmented into Tissue Plasminogen Activator, Antiplatelet, Antihypertensive and Anticoagulant. On the basis of application, the Stroke Diagnostics and Therapeutics Market is segmented into haemorrhagic stroke and ischemic stroke. Ischemic strokes are caused due to blocked or narrowed arteries that connect to the brain, which results in reduced blood flow in these arteries.

Hemorrhagic stroke is caused on account of the arteries in the brain either leaking blood or bursting open. In the TIAs, the flow of blood to the brain is only disrupted temporarily for a short period of time. By geography, it is segmented into North America, Europe, Asia Pacific, and Rest of the World. North America has the largest market for stroke diagnostics and therapeutics

followed by Europe. This is due to the increasing number of patients at the risk of developing stroke, technologically advanced equipment for the diagnosis and treatment of stroke, rise in research and development activities, increasing awareness among people about the causes of stroke, and improved healthcare infrastructure in the region.
