

Take highly potent compounds to the next level with Heraeus, SKAN AG, Boehringer Ingelheim, Roche and many more

The demanding nature of HPAPI manufacturing teamed with the necessary level of investment makes outsourcing attractive

LONDON, UNITED KINGDOM, January 24, 2017 /EINPresswire.com/ -- Highly potent active pharmaceutical ingredients (HPAPIs) represent a significant revolution in the way pharmaceutical

innovators are using small molecules to deliver new patient therapies. This change towards highly potent APIs has not only led to the production of more effective medicines that require lower doses and lead to fewer side effects, but also to new manufacturing challenges.

SMi's Highly Potent Active Pharmaceutical Ingredients conference will feature proficient speakers who recognise the challenges incurred when producing such high potency APIs. Expert Speakers include:

- Richard Denk, Head Sales Containment, SKAN AG
- James Evans, Vice President CMC, NuCana BioMed
- Jack Brown, Senior Principal Scientist, Boehringer Ingelheim
- Andreas Flueckiger, Chief Occupational Health Officer, Roche
- Alessandro Brigo, Toxicology Project Leader, Pharmaceutical Sciences
- Jason Hamm, Director of Chemical Development Operations, Bristol-Myers Squibb
- Gwydion Churchill, Associate Director of Chemistry, Antibiotics Business Unit, AstraZeneca
- Ildiko Ziegler, Distinguished Validation Expert, Gedeon Richter Hungary

The demanding nature of [HPAPI](#) manufacturing teamed with the necessary level of investment makes outsourcing an attractive, cost-effective option for biopharma companies.

With the in-depth product knowledge, development and manufacturing experience, technical know-how, reliable procedures, and cutting-edge facilities that will be shared at this year's conference, those in attendance can safely take their highly potent compounds to the next level.

Visit www.highlypotentapi.com/ein for more information or to view the complete two day agenda. There is currently a £400 early bird discount for all bookings made before 31st January.

Highly Potent Active Pharmaceutical Ingredients (HPAPI) 2017

22nd – 23rd May 2017

London, UK
