

BioSSL wins the Fintech Finance Silver Award for Best Biometric Solution.

WELLINGTON, SOMERSET, UNITED KINGDOM, January 28, 2017 /EINPresswire.com/ -- Quote Finance Fintech:

"By using three human verification pathways – fingerprint, voice and facial recognition – web security expert [BioSSL](#) locks down access to hackers. Its unique feature is that it does not allow for the storage of images, scans or biometric features on a local device or server, thereby preserving their integrity if the device is stolen, damaged or lost.

BioSSL's fingerprint and facial recognition template cannot be reverse engineered. Security is entirely handled on the BioSSL server and no two private-public keys are ever the same.

The company is an omni-channel solution for banks, financial institutions, e-commerce and government, using military-grade ID systems."
