Description

"DevOps is an approach to software development that enables better collaboration between the development and the operations teams. Basically, it is a methodology that aims to bridge the gap between developers and operations during software development to facilitate a more productive and efficient workflow. Ultimately, it enables continuous delivery to benefit the company at large.

Tools that facilitate DevOps and support its principles are referred to as DevOps tools. These include API tools, collaboration and organizational tools, configuration management tools, build automation tools, application and infrastructure monitoring tools etc."
