

Preferred Flower Shop Phone Services Provider, TieTechnology, Reveals Advice for Best Solutions in Cost Containment

Flower shop owners can get low cost but high quality VoIP communications to help them do more business with enterprise solutions tools, thanks to TieTechnology.

TAMPA, FLORIDA, UNITED STATES, March 6, 2017 /EINPresswire.com/ -- TieTechnology, a leading name in communications, offers the very [best VoIP phone systems for floral shop owners](#). The communications company provides exceptional voice over internet protocol enterprise solutions for businesses of all sizes. In today's technologically driven environment, it's imperative to have state of the art communications systems in place, to stay competitive. VoIP is the new standard for business communications, because of the following benefits it provides:

Robust Suite of Useful Features

Business owners and managers can listen-in to live calls, review recorded calls, and facilitate better customer relations during live calls through VoIP."

TieTechnology.com

TieTechnology, the top [flower shop phone service provider](#), offers several helpful communications features, including, but not limited to: call conferencing, video conferencing, call waiting, call blocking, call queuing, call screening, mobile connecting, and many more. These and more features can easily be accessed for on-demand activation or deactivation.

Plug Right into Existing Systems

With VoIP, it's easy to transition because it seamlessly plugs into existing software and equipment. We integrate with floral systems like [RTI](#), [Dove](#), [Mercury](#), [MAS](#) and [Floral Prodigy](#). This means during the switch from traditional phone service to voice over internet protocol; there's very little downtime, a big plus for businesses. It also means there's no additional equipment to purchase, saving, even more, money. That's simply not true with traditional telephone service. It requires an expensive technician to implement when new equipment is involved.

Improve Customer Experience through Better Training Tools

TieTechnology Business Phone Service

Call Tracking & Call Reporting

Not only does VoIP provide standard call features, but it also helps to improve customer service with helpful training tools. Business owners and managers can listen-in to live calls, review recorded calls, and facilitate better customer relations during live calls. As a result, sales increase and customer retentions rates rise.

Multiple Communications Forms Management

Businesses can waste a substantial amount of time trying to access and manage different forms of communications. Hunting for faxes, searching through email inboxes, retrieving chat sessions, scrolling through texts, and skipping through voicemails. With VoIP, all these forms communications can be accessed and managed from one location through one easy to use interface.

Scalable and Portable

Traditional phone service is expensive and difficult to scale, regardless if it's up or down. Conversely, VoIP can be scaled up or down with very little time and effort. It's super simple to relocate because it's easily portable. Traditional telephony is large, bulky, and is very challenging to relocate.

In every way, VoIP surpasses traditional phone service because it employs the latest in communications technology. Therefore, it offers more features, is portable and scalable, and, can be used on desktop phones and computers, as well as tablets and smartphones.
