

# TieTechnology Reigns as a Top VoIP Business Phone Service Provider for Flower Shop Owners Around the Nation

*Learn some smart, cost-cutting ways a flower store owner can increase their revenues with helpful and quality VoIP services from industry leader TieTechnology.*

TAMPA, FLORIDA, UNITED STATES, March 13, 2017 /EINPresswire.com/ -- TieTechnology, the [best floral VoIP phone company](#), is making smart and comprehensive communications solutions truly affordable. Traditional phone service is very limited and quite expensive. Voice over internet protocol is quickly becoming the new standard for business communications because it allows companies to do a lot more with a decidedly smaller investment. VoIP puts the power of technology to use and offers the following benefits:

## Better Voice Quality for Less Money

We integrate with floral systems like RTI, Dove, Mercury, MAS and Floral Prodigy. Because of this capability, businesses do not have added costs to use VoIP, unlike traditional phone service.”

*TieTechnology.com*

TieTechnology, the [best VoIP phone systems for floral shop owners](#), offers top-notch communications tools for businesses of all sizes. VoIP provides better voice quality for less money because it uses the power and speed of the internet to send tiny data packets at super high speeds. This system reduces any latency and provides a more stable connection.

## Plug into Existing Systems and Software

With VoIP, businesses can easily integrate their existing equipment and software. We integrate with floral systems like [RTI, Dove, Mercury, MAS and Floral Prodigy](#). Because of this capability, businesses do not have added costs to use VoIP, unlike traditional phone service.

## Cheap Long Distance and International Calling Rates

Traditional phone service relies on technology developed in the late nineteenth century. It depends on PBX, or private branch exchange, uses dated infrastructure. Because it must regularly be maintained, it's far more expensive to make long distance and international calls. VoIP is different and therefore, less expensive.

### Easy Communications Access and Management

Traditional phone systems are very limited in their flexibility scope. Since traditional telephony depends on very outdated technology, it's quite difficult to go beyond basic voice calls. Even though it does offer some features, these are expensive to obtain. VoIP is different because it's technologically advanced. So, VoIP offers a multitude of features; that can be added or removed easily and do more for far less money.

What's more, calling features can be managed with ease. Add or delete features on-demand, without any hassle. Also, businesses can manage extensions and phone numbers. VoIP even gives companies the option to add new numbers to other area codes to establish a local presence.

### Setup, Configure, and Use with No Hassle

VoIP not only provides many useful features, such as call waiting, call recording, call monitoring, call routing, call queuing, and more, it's also a cinch to setup. There's no need to contract an expensive technician to setup and configure, unlike traditional phone service. It's also portable, making it easy to relocate and can be scaled up or down when needed.
