drives-up calling costs. VoIP uses small data packets, sent at super high speed. This process means long distance and international calling rates are decidedly lower. Voice quality and connection are also superior.

Use Existing Equipment and Systems

With VoIP, companies are not burdened with extra equipment or software purchase costs. We integrate with floral systems like [RTI, Dove, Mercury, MAS and Floral Prodigy](#). When switching to VoIP, businesses will experience minimal downtime since this technology integrates seamlessly. In addition to quick integration, there's also no need for an expensive technician. Practically anyone can setup and configure VoIP; plus, it's a cinch to manage.

"IF KNOWLEDGE IS POWER, REPORTING IS PRICELESS."

Enjoy Useful Features Galore

One of the biggest drawbacks to traditional PBX phone service is its lack of feature management capabilities. There's little companies can do on their own to add or remove features, when needed. That's not the case with VoIP. Add or delete features, extensions, and phone numbers from one easy to use interface on-demand.

Use Portable Technology for Business

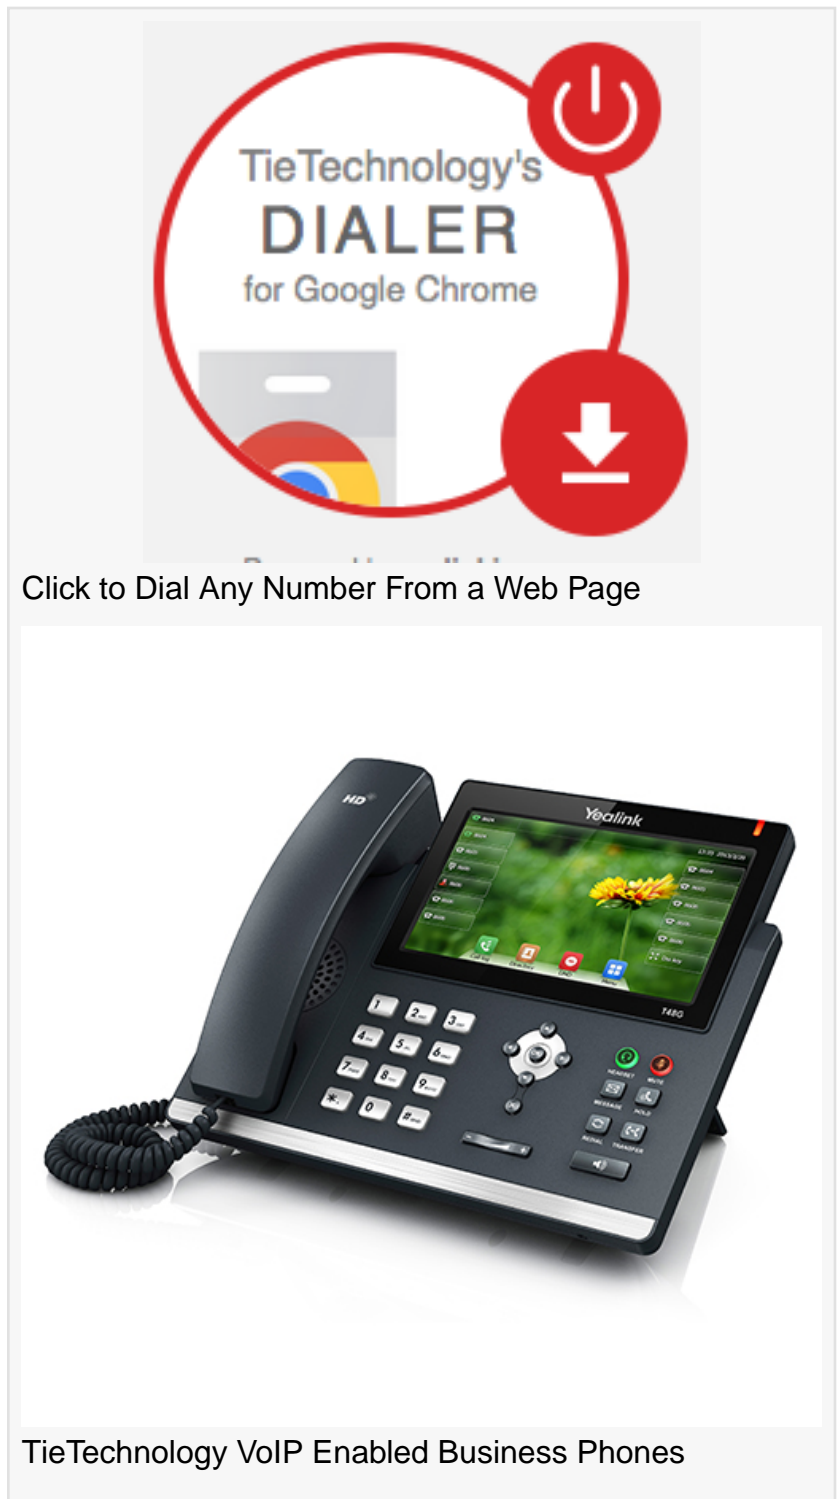

Employees can use the company's VoIP system on their smartphones, saving them a voice, data, and text costs. It also can be used on desktops, laptops, and tablets. VoIP is literally an on the go technology that offers enhanced flexibility. What's more, it can be relocated when moving from one retail shop or office to another. It's not awkward and bulky like traditional phone equipment. Also, it can be scaled when needed, either up or down with minimum effort.

VoIP is the new standard for business communications because it offers so much for little money. It's versatile, simple to use, and easy to integrate with existing software and equipment.
