

Announcing Teleflora's Best In Communications Saving Opportunities For Flower Shop Owners Provided by TieTechnology

Now, flower shop owners can get the best in VoIP and communications tools to reduce costs while increasing profits, thanks to industry leader TieTechnology.

TAMPA, FLORIDA, UNITED STATES, April 30, 2017 /EINPresswire.com/ -- TieTechnology, a leading communications provider that supplies the [best VoIP phone systems for floral shop owners](#), is showing the way to save money month after month. Voice Over Internet Protocol, or VoIP, is fast becoming the new business communications standard because of its superiority over traditional telephone service. It saves on costs and offers many benefits to businesses, which include the following:

Great Voice Quality but Lower Calling Costs

Call Tracking, Call Reporting and the Mobility App are great for flower shop owners.”

TieTechnology.com

TieTechnology, the top name [flower shop phone service provider](#), offers VoIP enterprise communications solutions that stand out from the competition. VoIP surpasses traditional telephone service because it harnesses the power and speed of the internet. Instead of routing calls through arcane infrastructure, it sends tiny data packets at high speed. This reduces call latency and increases call quality. Also, VoIP long

distance and international call rates are lower because there's no outdated equipment to maintain, unlike traditional telephony.

Plug Directly into Existing Systems Seamlessly

With VoIP, businesses do not have to purchase additional equipment. What's more, companies can simply integrate their existing equipment and software. We integrate with floral systems like [RTL, Dove, Mercury, MAS and Floral Prodigy](#). This is a big advantage because it seriously reduces downtime when switching from traditional phone service to VoIP. It also doesn't require special technical skills to implement, unlike traditional telephone equipment.

Manage All Communications Forms Easily

VoIP gives business more productivity power through communications management. Find and manage all communications forms from one location, including email, voicemail, texts, fax, instant messages, and chat sessions. This capability allows owners and employees to increase their productivity in day to day operations.

Manage Features, Extensions, and Phone Numbers Effortlessly

Traditional phone service is limited in its features, and those available are expensive. This is because traditional PBX systems work on archaic equipment, which is seriously limited. VoIP is nearly limitless because it employs state of the art technology, utilizing the power of the internet. Therefore, features can be added or removed on-demand. Extensions can also be managed easily, with little effort, as well as phone numbers. Also, new phone numbers in different area codes can easily be created to establish a local presence.

VoIP clearly beats traditional phone service in every way. It's portable, scalable, easy to use, offers an impressive suite of useful features, and, does so at a lower cost. Now is the time to make the switch from traditional phone service to VoIP to lower communications costs, increase productivity, and improve customer relations.
