Government Cloud Market to Grow at a 45.16% CAGR Forecast to 2021

Global Government Cloud Market 2017 Analysis and Forecast to 2021

PUNE, INDIA, February 10, 2017 /EINPresswire.com/ -- Government organizations are looking forward to increasing efficiency and improvement in service delivery. This is being effectively facilitated by the adoption of cloud services. Government agencies look for security and scalability in their cloud services solutions. Other cloud services are being integrated with the existing private cloud, which is seen as a major driving force for government cloud market. The U.S. is leading the market with major policies formulated for the adoption of cloud solutions. Cloud implementation across different government organizations increases the cross collaboration between them and work collectively towards reaching a common goal and provide better services to citizens.

Request a sample report @ https://www.wiseguyreports.com/sample-request/474196-government-cloud-redefining-business-models-for-and-the-challengers-2015-2020

The report deals with global government cloud market for the period 2016 - 2021. This market is expected to grow at a CAGR of 45.16% for the forecast period.

The report also provides key insights into strategies, market shares and solutions of key vendors like Amazon Web Services, VMware, CISCO, IBM, Microsoft, Oracle, Rackspace, Google, Salesforce and CGI operating in government cloud market.

DRIVERS

The key factors driving this market are:

Government policies towards the adoption of cloud services and better security cloud solutions.

The government provides the ability to easily share and collaborate at minimal cost.

RESTRAINTS

The key factor restraining this market is:

This may not be the right choice for every community and also, the rate of adoption being slow might affect the demand growth of the government cloud market.

WHAT THE REPORT OFFERS

The report covers the entire market in five parts:

Section 1 is introductory and Section 2 gives an overview of the government cloud market. It delves into the technology snapshot, drivers and restraints and growth prospects of the industry.

Section 3 and 4 break down the market by delivery models and regions and analyze the growth, trends and forecasts. The report also focuses on market shares of key players, their products and services along with our analysts' views of the market. This is done with the aim to give a complete overview of the market to the reader and enable them to draw their own conclusions about the market.

Section 5 deals with the competition among government cloud solution vendors and comparison of their products. This section speaks on the growth strategies adopted by some of the most active companies in this industry.

Section 6 analyzes key challengers in this market while Section 7 tells about the role played by business accelerators, mergers and acquisitions that have happened over the previous year and the investment firms which are investing in this domain.

The last section gives a glimpse into what the future of the industry would be like five years from now. It includes answers to questions like, what policies would impact the market most and what growth strategies would be most successful, etc.
