Key Highlights

- The airlines industry comprises passenger air transportation, including both scheduled and

chartered, but excludes air freight transport. Industry volumes are defined as the total number of revenue passengers carried/enplaned (departures) at all airports within the specified country or region, excluding transit passengers who arrive and depart on the same flight code. For the US and Canada, transborder passengers departing from either country are considered as part of the international segment. Industry value is defined as the total revenue obtained by airlines from transporting these passengers. This avoids the double-counting of passengers. All currency conversions in this profile were carried out using constant 2015 average annual exchange rates.

- The global airlines industry had total revenues of \$583,319.1m in 2015, representing a compound annual growth rate (CAGR) of 7.3% between 2011 and 2015.

- Industry volume increased with a CAGR of 5.2% between 2011-2015, to reach a total of 3,313.8 million passengers in 2015.
