PUNE, INDIA, February 17, 2017 /EINPresswire.com/ -- Hoisting equipment is used to lift loads with either link or roller chain or wire rope. These material handling equipment work in conjunction with overhead or workstation cranes. [Hoists](#) are majorly used in manufacturing, warehousing, and construction among other industries. Rising mining activity and increasing shale gas exploration is augmenting the demand for lifting equipment in order to ensure a high level of safety and reliability during the production process. Furthermore, increasing globalization has resulted in a high volume of exports and imports, thereby raising the demand for hoisting equipment at ports to load/unload heavy or bulky raw material or finished goods. Due to high growth of construction and manufacturing industry in Asia Pacific region coupled with the increase in infrastructure activity owing to rising population, rising disposable incomes and increasing demand for residential and commercial buildings in emerging economies such as India and South Korea, the region is projected to witness the fastest market growth during the forecast period.
