

Global MRSA Drugs Market is Expected to Reach USD 3.1 billion by 2022

The global market for MRSA Drugs is growing at a balanced pace and expected to reach USD 3.1 Billion by the end of 2022.

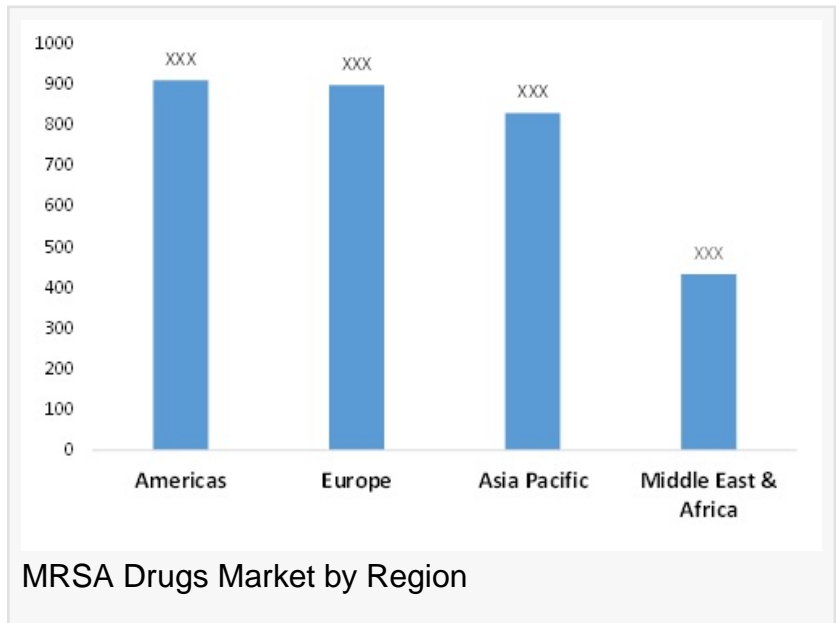

PUNE, MAHARASHTRA, INDIA, February 17, 2017 /EINPresswire.com/ -- [MRSA Drugs market](#) is growing steadily post 2016 as the market is boosted due to increasing awareness of MRSA Drugs and demand for fungal treatments. The market for global MRSA Drugs is expected to reach US\$ 3.1 billion by the end of the forecasted period.

Market Highlights

The global MRSA Drugs market has been evaluated as steadily growing market and it is expected that the market will continue to grow similarly in the near future. MRSA is a contamination of the skin that arises mostly in hospitals and healthcare amenities. It is treated with commonly used antibiotics and usually spreads from person to person through skin-to-skin contact. Doctors often find MRSA harder to treat than most other strains of *Staphylococcus aureus* because it is sometimes resistant to generally used antibiotics such as methicillin. MRSA infection can fight the effects of common antibiotics given for the treatment of infections, which makes this infection more complex to treat. Because of which this infection can spread and sometimes become life threatening. If the infection spreads it can effect a patient's lungs, bloodstream, heart, joints and bones. Some of the factors driving the MRSA Drugs Market are growing geriatric population which are vastly affected by such infections, particularly in healthcare facilities wherein weakened immunity systems will make them easily prone to infections and diseases. Early detection of these infections and growing awareness of these treatment drugs will positively support the growth of the market in the coming years.

MRSA Drugs Market Players:

- Allergan, Plc
- Merck Inc
- Pfizer
- Savara Pharmaceuticals

Regional Analysis:

Depending on geographic region, MRSA Drugs market is segmented into four key regions: America, Europe, Asia-Pacific, and Middle East & Africa. Globally America is the largest market for MRSA Drugs. North American region is the leading market in the America region with countries like United States and Canada playing a major role in the industry. Europe is the second-largest market globally for MRSA Drugs which is expected to continue its growth in the near future. Asia pacific region is expected to be fastest growing region in MRSA Drugs market.

Segmentation:

MRSA Drugs market has been segmented on the basis of drug class which comprises Folate antagonist, Lipopeptides, Tetracycline, Oxazolidinone, Cephalosporin, and Lipoglycopeptide. On the basis of drug origin the market is segmented into semisynthetic and synthetic drugs and others. Synthetic drugs are expected to capture the major share of the market as compared to the semisynthetic and other types of drugs in the market. However, during the forecast period the sale of the semisynthetic drugs is expected to grow at a faster CAGR as compared to the other segments. This is because of the increasing inclination of pharmaceutical companies towards the innovative technologies which involves natural ingredients.
