Marketing Automation helps firms in quickly identifying and qualifying significantly increased number of leads, this helps in the coordination between various members across the sales teams and also enables the tracking of progress on a case to case basis. This helps the marketing teams to improve their campaigns by planning better based on the previous results. The increasing online presence of small and medium businesses on the internet to capture customers via email marketing and social media is the core driver to this market. The enormous amounts of data generated needs to be tracked and analysed which is done very effectively by the software.

This also helps in the management of the allocation of resources by the firm as the software can be used to provide advanced reporting and analytics tools to measure the performance of initiatives. The report provides a detailed analysis of the usage of Marketing Automation

Software by various kinds of users from B2B sellers to email marketers. Detailed market shares are given and the dynamics of the market are forecasted for the next five years. The major companies in the market like IBM, HP, Evolven are studied and their strategies are analysed. Recent developments and their impact on the market are analysed.

The industry landscape is shifting with the acquisition of smaller firms by big companies like Adobe and Salesforce. The increasing number of options has resulted in a fierce competition for low prices, this cost shift however has opened up new markets with smaller businesses now being able to afford the software.
