Aerospace Additive Manufacturing Market to Grow Significantly at a High CAGR of 21% during 2016 to 2022

Global Aerospace Additive Manufacturing Market by Technology (3D Printing, Laser Sintering, Stereo Lithography) and by Region - Forecast To 2021

PUNE, MAHARASHTRA, INDIA, February 22, 2017 /EINPresswire.com/ -- Synopsis of Aerospace Additive Manufacturing Market

Market Drivers and Forecast

> Key Players in the market are 3D Systems, Arcam, EOS, ExOne, Stratasys, ATI, Carpenter Technology, Concept laser, CRP Technology, Optomec, Proto Labs, Renishaw, SLM Solutions, and Voxeljet”
> *Market Research Future*

The Aerospace Additive Manufacturing Market is expected to grow at a CAGR of around 21% during 2016-2021. The key factors driving the growth are weight reduction & fuel consumption, feasible & eco-friendly manufacturing process, growth in utilization and acceptance in the aerospace industry, and ease of manufacturing for complex parts & freedom in design.

Key Players in Market

Some of the key players in the Aerospace Additive Manufacturing Market are

- 3D Systems
- Arcam
- EOS
- ExOne
- Stratasys
- ATI
- Carpenter Technology
- Concept laser
- CRP Technology
- Optomec, Proto Labs
- Renishaw, SLM Solutions
- Voxeljet

Market Overview:

As per the MRFR analysis, issues related to its commercialization, expensive AM materials, slow adoption of this technology against convention manufacturing process are the factors restraining the market growth. Metal-based addictive manufacturing is growing at a rapid speed and is expected to lead the market into the 21st-century.

Regional and Country Analysis of Aerospace Additive Manufacturing Market

As per the MRFR analysis, the Americas region will continue its dominance in the forecast period. Whereas, APAC and EMEA will have significant growth and is expected to grow at healthy CAGR of around 21% and 20%, respectively during the forecast period

About Market Research Future:

At Market Research Future (MRFR), we enable our customers to unravel the complexity of various industries through our Cooked Research Report (CRR), Half-Cooked Research Reports (HCRR), Raw Research Reports (3R), Continuous-Feed Research (CFR), and Market Research & Consulting Services.

MRFR team have supreme objective to provide the optimum quality market research and intelligence services to our clients. Our market research studies by products, services, technologies, applications, end users, and market players for global, regional, and country level market segments, enable our clients to see more, know more, and do more, which help to answer all their most important questions.

In order to stay updated with technology and work process of the industry, MRFR often plans & conducts meet with the industry experts and industrial visits for its research analyst members.
