

Multi-Wing announces it is a single-source provider for fan and fan clutch systems

BURTON, OHIO, UNITED STATES, February 22, 2017 /EINPresswire.com/ -- BURTON, Ohio — Multi-Wing, the leading supplier of high-performance axial flow fans, is now a single source for fan and fan clutch systems. The viscous clutches are either electronically controlled or air sensing via bi-metal sensor. These fan drive systems are ideal for off-highway and stationary equipment, including ag tractors, skid steers, excavators, construction equipment, pavers, articulated dump trucks and power generators.

Available for small- to large-quantity orders, these products help meet stringent emissions requirements, provide fuel savings and significantly reduce noise. The fan clutches have a broad modulation range, low off-speed and flexible mounting options. This line of products reduces cooler clogging, and is maintenance free with a long operating life.

“OEMs benefit from responsive, expert engineering support,” says Jim Crowley, president of Multi-Wing America. “We work with customers to specify the right modular system to provide optimal airflow for their specific application.”

Paired with an innovative customized Multi-Wing fan, the electronically controlled fan clutches are available in a wide torque range, respond quickly with precise modulation, and are suitable for low-temperature operating conditions. Lightweight and durable, the bi-metal fan clutches have high temperature sensitivity and a fast response time.

To discuss your specific application with our dedicated engineering support team or to learn about Multi-Wing’s fan and fan clutch systems, call +1 440.834.9400, visit www.multi-wing.net/clutch, or email info@multi-wing.net.

Multi-Wing America

Founded in 1972 as The Crowley Company, Multi-Wing America is North America’s leading supplier of high-performance axial flow fans. As an ISO 9001:2008, 14001:2004-certified company, Multi-Wing delivers exceptional service, prototyping and modular fans in the broadest range of materials and blade profiles. Headquartered in Burton, Ohio, the company specializes in providing small- to large-volume customized fans for HVACR, industrial heat exchangers and engine cooling markets. Multi-Wing is also a single-source provider for fan and fan drive systems for engine-cooling applications.
