

CollaBoard's Latest Release Makes Teamwork Easier, Faster.

A New Way To Work With Your Virtual Team

BONSTETTEN, ZÜRICH, SWITZERLAND, February 27, 2017 /EINPresswire.com/ -- February 2017 – Zurich, Switzerland – Leveraging its expertise in business application development, IBV just released a new version of [CollaBoard](#), its real-time UWP collaborative app. The new release brings full Surface Studio, Surface Dial, QR Code and NFC support in combination with a redesign and 50% faster loading times for New Projects.

CollaBoard is a collaborative application for Microsoft [Surface Hub](#), Surface Studio and Windows 10 devices allowing professionals and teams to work together in real time from different locations. First launched in November 2016, it features a natural user interface (NUI) with inking, touch and voice commands for an easy and intuitive user experience, and it includes Skype for Business integration for simultaneous conference calls.

CollaBoard is the only virtual workspace offering voice commands and real-time capabilities on a complete range of features, not just sticky notes. Its latest version also makes it the only collaborative NUI app offering Surface Studio and Surface Dial support.

CollaBoard provides a real-time virtual workspace allowing professionals and teams across all industries to work together more efficiently. Its easy-to-use, immersive interface enables highly engaging meetings. The app also makes for an essential tool in concept work and sales presentations.

About IBV Informatik AG IBV is a Software Development and Consultancy firm based in Zurich and Berlin.
