

# Biodegradable Paper Packaging Market to Reach \$375.46 million with 6.92% CAGR Forecast to 2021

*Global Biodegradable Paper Packaging Market 2017 Share, Trend, Segmentation and Forecast to 2021*

PUNE, INDIA, February 28, 2017

/EINPresswire.com/ -- There has been increased focus towards the packaging solutions which are harmful to nature. Demand from environmental activists and consumers alike has made sure that packaging manufacturers innovate solutions which are environment-friendly and can keep the products safe for longer period. Paper, even though derived from the plants, is biodegradable and may contain coatings and heavy metal ink that often prevents them from meeting compostable or biodegradable requirements. Bio-Degradable [Paper Packaging](#) market is mainly driven by the growing conscientious population and Government Regulations, which have started focusing on reduction of wastage and usage of Bio-Degradable packaging materials. However the growth and advancement in Biodegradable plastics and the higher cost of materials are hindering the growth of this market.
