

Kenandy to Present at Snowforce, A Salesforce Community Event in Salt Lake City

REDWOOD CITY, CA, UNITED STATES, February 28, 2017
/EINPresswire.com/ -- Kenandy, an [enterprise resource planning](#) (ERP) solution built natively on the Salesforce platform, will present a technical presentation about hyperfast interfaces for Salesforce at Snowforce in Salt Lake City on March 2, 2017. Snowforce is one of the largest Salesforce community gatherings in the nation and will be attended by several of Kenandy's executives.

What:

The presentation at the event is titled “HyperBatch: A Hyper-Fast Batchable Interface for Salesforce.” The seminar caters to developers and Salesforce implementation consultants and will focus on the best ways to maximize the Apex Batchable interface and run batch jobs simultaneously.

The session will explore how to use Salesforce APIs, PK chunking, parallelism, and Queueables to rethink how a batch is architected. HyperBatch can take a traditional batch job that takes an hour to run and process it in minutes. The solution is large data volume friendly and it still uses the familiar start(), execute(), and finish() methods; therefore, it can be implemented on the first existing Apex batch jobs. An abstract to the discussion can be [found here](#).

Who:

Daniel Peter, Kenandy Lead Applications Engineer, Salesforce MVP, @danieljpeter

When:

March 2, 2017

Time: 3:30 p.m. - 4:20 p.m.

Where:

The Depot

13 North 400 West South Temple, Salt Lake City, UT 84101

Room: Blue Goose 1
