

Learningonline.xyz to unveil its unique Language Learning Bot at ATD 2017 International Conference & Expo in Atlanta

Learningonline.xyz plans to unveil its unique Language learning bot at ATD 2017, the largest talent development expo in the world

CUPERTINO, CA, UNITED STATES, February 28, 2017 /EINPresswire.com/ --

Learningonline.xyz will be a Gold category sponsor of the ATD 2017 International Conference & Exposition, the largest event for talent development professionals worldwide. The event is organized by the Association for Talent Development and will take place in Atlanta, USA. As the largest exhibition and conference for talented professionals, the expo attracts thousands of learning & development professionals from across the globe annually.

The reason the potential of conversational Bots excite us so much is that they allow us to push the boundaries of education even further.”

Sue Brett, C.E.O. of Learningonline.xyz

Learningonline.xyz will be showcasing their ecosystem of edTech and eLearning solutions modeled on ‘[concierge learning](#)’, which provides instant and quick solutions to performance related problems through curated programs for personnel development. The company also plans on unveiling the ‘Language Learning Bot’, which aids language learning through conversational scenarios.

Sue Brett, C.E.O of Learningonline.xyz commented: “As our learning content is based around creative tech solutions for good 'concierged' content, we are able to offer highly accessible online training through low-cost pricing and smartphone access. The reason the potential of conversational Bots excite us so much is that they allow us to push the boundaries of education even further. Imagine your very own language buddy who is always in a fantastically chatty mood, and who is available 24/7 other than the odd re-charge!”

Conversational Bots can engage in question and answer sessions to help with rote memorization and then engage in simple dialogues that take the memorized material and turn them into conversational pieces to help with fluid language learning. The latter possibility is very crucial because it's one of the downfalls of language learning.

The presence of technology has been increasing significantly in [training of employees](#). In the recently released ATD 2016 State of the Industry report, it was observed that organizations spent an average of \$1,252 per employee on training and development initiatives in 2015, a \$23 increase from 2014. edTech, including apps, bots and "concierged" LMS platforms, will be the major breakthrough for B2B solutions this decade.

END

About Association for Talent Development:

The Association for Talent Development (ATD) is the world's largest professional membership organization supporting those who develop the knowledge and skills of employees, improve performance, and help to achieve results for the organizations they serve. Originally established in 1943, the association was previously known as the American Society for Training & Development (ASTD). ATD's members come from more than 120 countries and work in public and private organizations in every industry sector. ATD supports talent development professionals who gather locally in volunteer-led U.S. chapters and international member networks, and with international strategic partners. For more information, visit www.td.org.
