

# IT Governance launches New York DFS Cybersecurity and ISO 27001 training courses

WYOMING, UNITED STATES, March 3, 2017 /EINPresswire.com/ -- IT Governance, the leading global provider of cybersecurity, risk management and ISO 27001 expertise, is pleased to announce the launch of a new online course series tailored to the NYDFS (New York State Department of Financial Services) Cybersecurity Requirements for Financial Services Companies.

As a result of increased cyber attacks targeting financial institutions, the NYDFS released the “first in the nation” Cybersecurity Requirements to ensure the protection of consumers and financial systems.

Alan Calder, the founder and executive chairman of IT Governance, said: “New York financial organizations can not only meet NYDFS requirements but also ensure they are prepared in an ever-changing cybersecurity landscape by implementing ISO 27001, the internationally recognized information security management standard.”

IT Governance offers two ISO 27001 classes focused on the Cybersecurity Requirements. Both are available in an interactive Live Online format, which is more cost-effective compared to classroom learning. These courses provide delegates with a comprehensive and practical understanding of the Regulation and how it aligns with ISO 27001, plus additional controls to help organizations implement a robust cybersecurity program.

The one-day [New York DFS Cybersecurity & ISO 27001 Certified ISMS Foundation course](#) will provide delegates with an introduction to ISO 27001 best practice and certification, an understanding of how to identify some primary risks associated with cyber crime, and clarification on how ISO 27001 controls align with the measures needed to satisfy the Cybersecurity Requirements.

The three-day [New York DFS Cybersecurity & ISO 27001 Certified ISMS Lead Implementer](#) course has been designed to enable individuals to achieve the ISO27001 Certified ISMS Lead Implementer (CIS LI) qualification and ensure their ISO 27001 project aligns with the Cybersecurity Requirements. An experienced trainer and consultant will guide you through nine steps to ISO 27001 success and help you develop the skills required to achieve ISO 27001 compliance for your organization.

IT Governance supports professional development. Upon successfully completing the course and passing the exam, delegates will be awarded the ISO27001 Certified ISMS Lead Implementer (CIS LI) qualification.
