

Elevated Roofing, A Frisco, Texas Roofing Company, Awarded RCAT License

FRISCO, TEXAS, UNITED STATES, March 2, 2017 /EINPresswire.com/ -- Elevated Roofing, a [Frisco, Texas roofing company](#) serving all of North Texas has earned a major roofing industry accreditation. The voluntary step propels Elevated into an elite group of licensed roofing contractors in the state.

Homeowners are often surprised to learn that the state of Texas does not have an official license or roofing regulation. Which played a large part in the decision to become a Licensed Roofing Contractor through RCAT.

RCAT is a Texas based program designed to "increase consumer protection and secure public confidence in the roofing industry by elevating the roofing contractor's knowledge, skills and professionalism... by verifying that a contractor has met the standards of a true professional roofing contractor."

Some of the criteria include:

- The company must be based in Texas for at least 3 years
- The company must carry insurance
- The company must pass a thorough credit and background check
- The company must pass a business and safety knowledge exam
- The company must pass a residential and/or commercial roofing exam
- The company must maintain at least eight hours of continuing education a year

Before becoming a licensed roofing contractor with RCAT, Elevated Roofing obtained the [Master Elite Certification](#) from one of the leading roofing material companies in the industry, GAF. Only about 3 percent of all roofing contractors are qualified to carry the Master Elite Certification.

In addition, Elevated Roofing has an A+ rating from the Better Business Bureau. This rating is based on thirteen factors, including: complaint history, years in operation, business practices, professional advertising, licensing and other industry achievements.

The RCAT license, combined with an A+ BBB rating and a GAF certification, positions Elevated Roofing as a [major provider of roof repair and replacement services](#) in the Dallas, Texas area.
