

World Laparoscopy Hospital Announces Sixth World Congress of Laparoscopic Surgeons

World Laparoscopic Hospital, specializing in minimal access surgery, today announce the upcoming World Congress of Laparoscopic Surgeons.

GURGAON, NCR DELHI, INDIA, March 3, 2017 /EINPresswire.com/ -- World Association of Laparoscopic Surgeons is representing medical professionals from all over the World who are involved in minimal access surgery, we will continue to advance minimally invasive surgical expertise and contribute to the growing knowledge of the diagnostic and therapeutic uses of laparoscopic, robotic, endoscopic and other minimally invasive techniques.

[Laparoscopic surgery](#) is a surgical technique in which operations are performed at a distance through small incisions. The surgical procedure is performed with the assistance of a video camera and several instruments known as laparoscopic devices. The camera provides an image of the organs inside the body onto a screen or a monitor from where the surgeon, can visualize the inside organs.

Thus, during laparoscopic surgery, the surgeon performs in a 3D plane but visualizes the procedure on a 2D screen. Due to the smaller incision made during laparoscopic surgeries, these surgeries have numerous advantages such as lower pain and less blood loss due to smaller incisions and faster postoperative recovery.

“

World Congress of
Laparoscopic Surgeons on
10th and 11th of February
2018”

Dr R K Mishra

The sixth Conference of World Association of Laparoscopic Surgeon will help the delegates to increase knowledge of laparoscopic surgery, robotic surgery, endoscopic, and minimally invasive surgical techniques.

This International Meeting of laparoscopic surgeon, gynecologist, and urologist consists of Postgraduate Master's Classes; Plenary Sessions; Laparoscopic da Vinci Robotic
